ABOUT MYSELF

Full-stack Developer with 3+ years of experience in **ReactJS** and **Node.js**, specializing in secure, high-performance applications for finance and network management.

WORK EXPERIENCE

🏢 Stordis GmbH – Stuttgart, Germany

City: Stuttgart | Country: Germany

Junior Value Driven Software Delivery Manager

[11/2023 – 03/2024]

- Designed and implemented structured JSON-based interfaces between React front-end and back-end (Django/Node.js) development, ensuring data integrity and seamless client-server interaction.
- Enhanced user experience by implementing a responsive user interface and refined design with HTML5 and CSS, improving accessibility and visual consistency across devices.
- Leveraged Neo4j GraphDB for fast data retrieval, saving 3 hours on data mapping.
- Utilized Django to create a clean back-end architecture, developing RESTful API endpoints with 65% test coverage.
- Built reusable front-end components and libraries, incorporating Redux for managing and centralizing application state.
- Managed version control and CI/CD pipelines via GitHub for efficient collaboration and deployment.
- Conducted performance testing and implemented security measures for optimal system functionality and data protection

🏢 Stordis GmbH – Stuttgart, Germany

City: Stuttgart | Country: Germany

Junior Software Developer (Working Student)

[04/2023 – 10/2023]

- Implemented secure coding best practices in both front-end (React) and back-end (Django/Node.js) development, reducing manual task time by 30% and enhancing user experience with responsive UI.
- Leveraged Neo4j GraphDB for fast data retrieval, saving 3 hours on data mapping.
- Implemented Django framework for clean back-end architecture, developing RESTful API endpoints with 65% test coverage.
- Employed HTML5 and CSS for UI structuring and styling, for polished user interface.
- Utilized GitHub for version control and CI/CD pipelines, ensuring efficient collaboration and deployment processes.
- Developed reusable front-end components and libraries, utilizing Redux to efficiently manage and centralize application.

🏢 Tata Consultancy Services – Mumbai, India

City: Mumbai | Country: India

System Engineer

[12/2018 – 01/2022]

- Implemented a comprehensive monitoring system for NEFT, RTGS, and IMPS transactions using Linux commands, reducing transaction lapses by 50%.
- Formulated robust APIs for UPI transactions, boosting work rate by 10% with BBPS integration.
- Enhanced efficiency by automating manual commands with Cron jobs, reducing memory allocation by 5%.
- Conducted workload assessments, reported bugs and errors, resulting in a 40% productivity.
- Optimized server downtime by configuring scripts for parallel loading in Oracle, reducing downtime by 4 hours.
- Developed scalable front-end interfaces using ReactJS with a focus on performance and maintainability. Integrated Node.js back-end services to enable real-time data processing and secure client-server communication.

SKILLS

Programming Languages

JavaScript / Python

Frameworks and Tools

ReactJS / React Hooks, React Redux / NodeJS / Postman / Bootstrap / Visual Studio Code / Github / Django

Middleware/Database Products

SQL / MongoDB / Neo4j (GraphDB) / Redis

Web & DevOps Tools

HTML5 / Docker / RESTful API / CSS

EDUCATION AND TRAINING

Master of Science in Applied Computer Science

SRH Hochschule Heidelberg [10/2021 – 09/2023]

City: Heidelberg | Country: Germany

Bachelor of Engineering in Information Technology

Shah and Anchor Kutchhi Engineering College [08/2015 – 07/2018]

City: Mumbai | Country: India

PROJECTS

1. Social Gateway for Alumni Students using MERN Stack

- Led development of an alumni networking platform for alumni using the MERN stack(MongoDB, Express.js, React.js, Node.js), enhancing networking and collaboration.
- Introduced a sophisticated UI design with React.js and Bootstrap, ensuring seamless, responsive experiences including profile management, event notifications, job postings, mentorship opportunities, and discussion forums

2. E-commerce Website using MERN Stack

- Built a responsive full-stack e-commerce application utilizing the MERN Stack (MongoDB, Express, React.js, Node.js), incorporating a comprehensive API for user account management and shopping cart operations.
- Developed and integrated both frontend and backend systems, including an administrative interface, ensuring seamless site management and optimal functionality across all devices

3. Live Tracking of Order, SRH Heidelberg

- Built a real-time location-tracking system using Node.js, Redis, and Map APIs. Optimized memory usage and enhanced tracking accuracy by 25%. Applied secure API design and efficient NoSQL data handling for robust digital finance use cases.
